Docket: EPA-R03-OW-2010-0736
Draft Chesapeake Bay Total Maximum Daily Load

Comment On: EPA-R03-OW-2010-0736-0001
Clean Water Act Section 303(d): Notice for the Public Review of the Draft Total Maximum Daily Load (TMDL) for the Chesapeake Bay

Document: EPA-R03-OW-2010-0736-0425
Anonymous public comment

Submitter Information

Organization: National Wildlife Federation Action Fund

General Comment

One day I was traveling from NYC to NC and suddenly I was breathless with the appearance of a magnificent body of water! I just had to look it up immediately on my map to see exactly where we were on that gorgeous crystal day! Sure enough it was Chesapeake Bay and it was one of the most inspirational body of waters I had ever experienced. I vowed to myself that I would return to explore this natural wonder. Clearly, our community depends on clean water for our health, livelihoods and economic security.

Unfortunately, pollution is killing the Chesapeake and hundreds of other rivers and creeks in the region. All this pollution gets collected into the bay, which is no better shape today than it was 25 years ago.

You now have the unique opportunity to do something about it, and the time has come to put strong, enforceable water safety standards in place to protect our homes, support our economy and ensure that our streams and rivers are healthy today and for our children's future.

I urge you to develop a strong pollution diet in my state that holds us all accountable for the pollution that is harming our wildlife and damaging our local economy. It is imperative that these plans address all sources of pollution and demonstrates how reductions will be gained. Citizens across this state and the region need your help to keep our water clean and protected.
